

JB's wear

2009 WORKWEAR AND OUTERWEAR

www.jbwear.com.au

Quality garments tailored exclusively for your corporate, promotional, sporting and club needs. All garments meet exacting quality and design specifications.

AS/NZS 1906.4:1997 DAY AND NIGHT

Hi Visibility (Day/Night)

Garment is classed highly visible during both day and night.

AS/NZS 1906.4:1997 DAY ONLY

Hi Visibility (Day)

Garment is classed highly visible during daytime.

JB'S WEAR DRI

This fibre is specially designed to absorb body perspiration into the fabric and to move the moisture to the surface where it is evaporated leaving the wearer fresh and cool.

BREATHABLE

Breathable fabric designed to improve wearing comfort while keeping the wearer warm and offering protection from the elements.

JB'S WEAR 2 in 1

This garment has the ability to be zipped together with a complimentary outerwear item. Once the fleece is zipped into the jacket it becomes its inner lining, forming 1 jacket.

WATERPROOF

Fabric is water proof coated and seams are taped to stop moisture penetration.

COOL VENTS

Mesh fabrics are inserted in strategic positions to allow body heat to escape from the garment.

EMBROIDERY ZIP

Hidden zips are sewn into the garment to allow embroidery and screen printing access to successfully enhance garments.

SHOWER PROOF

Outer fabrics are water proof coated to stop water penetration but seams are not taped.

STAIN RESISTANT

Protects from rain and stains. Breathable, durable, safe and gentle. Fabrics are easier to care for.

HOOD

Garment has hood in rear of collar.

AS/NZS 1906.4:1997 DAY ONLY

This product complies with AS/NZL 4399:1996

UPF - What does it mean?

Ultraviolet radiation, or UV, is present in sunlight.

Sunburn is a sign that your skin has received too much UV. Over exposure to UV over many years can cause more serious health problems such as skin cancer or cataracts. Garments that are sensibly designed for sun protection reduce your UV exposure.

It is often difficult to tell if a fabric offers good sun protection. The Ultraviolet Protection Factor (UPF) shows how well a fabric protects your skin from solar UV and lets you select sun protective clothing with confidence. Remember that the garment only protects the skin it covers. Protect other areas by wearing a hat, sunglasses and sunscreen and use shaded outdoor areas. UPF ratings range from 15 to 50. Fabrics that rate higher than 50 are labelled UPF 50+.

15	Good	40	Excellent
20	Good	50+	Excellent
25	Very Good		

COLOURS OF COTTON

Unlike traditional corporate wear, the individuality and quality of our clothes gives the feeling of a personal wardrobe.

PODIUM

Podium Sporting Wear is designed and manufactured to give the wearer the latest in garment technology specialising in your club, team, sporting colours.

PODIUM COOL

Podium Cool fibre is especially designed to absorb body perspiration into the fabric to move the moisture to the surface fabric where it is evaporated leaving the wearer fresh and cool.
