

## ICON KEY

Below are a list of icons to help you quickly identify certain important features belonging to some of our products.

**HIGH VIS MATERIAL**  
AS/NZS 1906.4:2010

This standard specifies the requirements for High Visibility materials used in the manufacture of industrial safety garments worn in situations where the wearer needs to be highly visible

**UPF RATING 50+**  
AS/NZ 4399:1996

Our fabrics have been UPF tested against Australian Standard AS/NZ 4399:1996. This means garments have excellent protection and the highest level of UV protection achievable in accordance with the above standard

**HIGH VIS DAY & NIGHT GARMENT**  
AS/NZS 4602.1:2011

Class D/N garments are suitable for either day or night use and consist of both high visibility fabric and reflective tape

**3M REFLECTIVE TAPE**

3M 8910 – Used for general domestic washing  
3M 9920 – Used for Industrial laundering  
3M 8935 – Flame Resistant tape, suitable for Industrial wash

**HIGH VIS GARMENT DAY ONLY**  
AS/NZS 4602.1:2011

Class D garments are suitable for day use only and consist of high visibility fabric. These garments should never be worn at night

**SUITABLE FOR INDUSTRIAL LAUNDRY**

Our garments are able to withstand the rigours of industrial laundering

# WORKCRAFT™

## TOUGH AS NAILS

---

Work wear has come a long way since the days of the navy boiler suit. And nowhere has it come further than with our tough-as-nails WorkCraft™ stock service range.

From trade to transport, the WorkCraft™ range has been designed and manufactured to exceed the demands of modern industry. Every item is rugged and hardwearing, but not at the expense of fit, comfort and ease of movement. In short, WorkCraft™ is designed to work for work.

The WorkCraft™ stock service range provides something for everyone. Far from drab and predictable, it incorporates a range of colours, fabrics, sizes and styles. Customers have a variety of features available such as tool pockets, mobile phone pockets, pen dividers and reinforced stress points. Uniquely, the WorkCraft™ stock range even includes garments suitable for industrial laundering.

Gone are the days of certain styles and colours denoting occupations. Whatever garment specifics are required, WorkCraft™ can make it. In true working tradition, no order is too big or too small.

Quality and durability are the hallmarks of WorkCraft™ garments. All garments comply with Australian Standard AS/NZS 4602.1:2011, and all fabrics comply with AS/NZS 1906.4:2010. We use only internationally recognised 3M Retroreflective Tape, #8910 for general domestic washing and #9920 for industrial wash at extreme temperatures.

For the ultimate in toughness, comfort and reliability, get the job done with WorkCraft™.

UltraSoft® | PROBAN®

# FLAMEBUSTER™

Through the ages, fire has been one of man's most invaluable tools – and greatest dangers. In today's industrial context, that danger has intensified and diversified as we employ increasingly clever methods to harness and manipulate an ever-expanding array of incendiary forces and materials.

Never has the need for flame-resistant clothing been more important. And rarely will you find a garment as up to the task as the made to order Flamebuster™ range.

**Currently, our Flamebuster™ range encompasses a basic selection of made to order garments. If these don't suit your requirements, we are also happy to custom manufacture to your specific designs.**

**A burning need**

These days, it's all about risk management. Companies have legal obligations under Occupational Health & Safety regulations to mitigate risk and safeguard employees like never before – especially in industries where severe or even fatal burns are an everyday possibility.

Providing adequate protective measures in these circumstances can be a problem. But Flamebuster™ is here to provide a solution.

**Critical protection**

Flamebuster™ garments combine the uncompromising quality, reliability and comfort for which our products are renowned, with the proven fire-resistant characteristics of two of the world's most highly regarded protective fabrics. The result is total peace of mind for those workers and employers in industries involving petro-chemical, electrical, oil, welding, chemicals and molten metals.

It only takes a momentary electric arc, flash fire or molten metal splash for non-flame-resistant clothing to ignite, and it will continue to burn even after the source of ignition has been removed. Flame-resistant clothing, however, not only provides thermal protection at the exposure area, it will also self-extinguish after the source of ignition is gone. In other words, it has the potential to avert disaster.

**Why Flamebuster™ works**

The quality of flame-resistant clothing depends on the fabric with which it is manufactured. Flamebuster™ garments are offered with a choice of two of the world's leading flame-resistant textiles – Ultra Soft® and PROBAN®. Both fabrics comply to Australian Standard AS/NZS 4824:2006 Protective Clothing - Wildland Fire Fighting.

**Ultra Soft® – 88% Cotton, 12% High-tenacity Nylon**

Performance and comfort feature in all garments produced using Ultra Soft® fabrics. The outer surface has enhanced wear-life due to the nylon's excellent abrasion resistance, and on the inside, breathable cotton fibres optimise comfort against the skin. Flame resistance is guaranteed for the life of every Ultra Soft® garment, even when using the most rigorous industrial laundering.

**PROBAN® - 100% Cotton**

A pre-cursor chemical is applied using a licensed process to impart a durable flame retardant treatment to cotton and cotton synthetic blended fabrics. Flame retardancy is achieved by the formation of a highly cross-linked inert polymer within the fibre.

Rather than igniting, PROBAN® treated fabrics decompose under the influence of flame to form a localised insulating char which stays in place and helps to protect the wearer. PROBAN® fabrics and garments do not smoulder, have no afterglow, and will not allow flame to spread outside the charred area.

For more information please contact our friendly and knowledgeable Sales team.

# CHEFSCRAFT™

A busy commercial kitchen is no place for the faint of heart. It's also no place for sub-quality uniforms. Comfort, movement and the ability to withstand heavy laundering are essential elements of any chef's garment. And with the ChefsCraft™ stock service range, these essentials are just for starters.

ChefsCraft™ uniforms offer the best of both worlds – they are competitively priced while giving you the ability to customise to your specific tastes and requirements. Style, function and affordability are assured.

Every item in our extensive stock range of jackets, trousers, aprons and hats is manufactured using only the highest quality fabrics and components. ChefsCraft™ garments maintain the essential aura of the traditional chef's uniform and adds a dash of contemporary edge, with a wide choice of styles, sizes and colours.

When you deal with ChefsCraft™, you deal direct with the designer and manufacturer. Our made-to-order service allows you to create a uniform unique to your business. Our in-house designers will happily work alongside you to turn your vision into reality.

The ChefsCraft™ range offers a wide selection of options, including choice of press stud closure, sleeve pen pockets, varying sleeve lengths and piping. Trousers are available in male and female cuts, as well as drawstring unisex styles. Aprons come in assorted lengths, with or without foldover and pockets, in black, white or navy stripe. And of course, our chef hats function as both iconic headwear and sanitary, protective essentials.

ChefsCraft™ also offers a range of general food industry apparel, including high-visibility items, from jac shirts with short or long sleeve options, to dust coats and drawstring trousers.

With ChefsCraft™, hospitality staff not only perform like true professionals, they will look and feel the part too.

## Napery

While ChefsCraft™ takes care of things in the kitchen, our commercial grade Napery range has things covered out on the floor.

Available in an extensive selection of table sizes, our Deluxe Plain Table Linen range has been created to stand up to the daily rigours of the hospitality trade, from the table to the industrial laundry. The range is made from highly durable 100% spun polyester, so, unlike cotton, it will not yellow or snag, resists pilling, and retains a pristine whiteness wash after wash.

For performance, appearance, feel and durability, the ChefsCraft™ Napery range is in a class of its own.

The logo for MEDI8, featuring the word "MEDI8" in a bold, sans-serif font with a stylized blue and white graphic element resembling a stethoscope or a pulse line.

# MEDI8™

Today's hospitals are busier than ever and medical professionals work tirelessly around the clock.

And behind the scenes, the laundries servicing them are working just as hard. A constant stream of garments passes through their machines – garments which need to perform for the healthcare workers and patients who wear them, day after day.

The Medi8™ stock service range of hospital and medical garments has been created with this demanding environment in mind. Every item has been designed and manufactured to optimise performance, comfort and durability.

Options in the Medi8™ range include plenty of pockets, reversible styles, and long or short sleeves, with an extensive selection of sizes.

Theatre gowns are made from polyester/cotton blends, ensuring total comfort during the longest of procedures. At the other end of the process, our patient wear includes soft, comfortable baby t-shirts and singlets as well as adult feeders.

No-nonsense, high quality hospital garments that perform the way they need to time and again. That's the Medi8™ promise.

HIP (20cm BELOW WAISTLINE)	132	137	142

FEMALE MALE

#### FEMALE

A) BUST  
Measure around the fullest part of the bust, keeping tape up under arms and around shoulder blades.

B) WAIST  
Measure around the waist, keeping the tape firm but not tight.

C) HIPS  
Stand naturally and measure around the fullest part of hips (approximately 22cm down from waist)

#### MALE

A) NECK  
Measure around your neck, at collar level. Remember, make allowance for comfort.

B) CHEST  
Standing naturally, measure around the fullest part of the chest, keeping tape under arms and around shoulder blades.

C) WAIST  
Measure around the waist, keeping one finger between tape and body. Measure over your shirt (not trousers) at the position you would normally wear your trousers.

D) INNER LEG  
Measure the inside leg on a pair of trousers that fit you well from the crotch to the hem.

#### MEASURING TIPS

- Use your exact measurements when selecting your size
- Measure over under garments
- Ask someone to measure you
